TERM

The Fund is established for an unlimited duration. However, the Board of Directors of the Fund may decide to close the Fund under certain circumstances.

OBJECTIVES

Principal assets traded

Equities of companies whose registered office and/or principal activities are in emerging countries, directly, through investment Funds and/or derivatives.

Investment strategy

The Fund seeks to achieve capital growth by investing in the principal assets traded over the recommended investment period.

Within the limits imposed by the Fund's objective and investment policy, the management team makes discretionary investment choices in the portfolio based on its analyses of the characteristics and growth prospects of the assets traded.

The Fund may use derivative products both for investment and hedging purposes (hedging against unfavourable future financial events).

The Sub-Fund is not an index compartment and will be actively managed.

Redemption of shares

On request, every day, in Luxembourg.

Other information

This Class distributes income. Dividend distributions are planned.

The return of the product is determined by using the net asset value calculated by the Central Administration. This return depends mainly on the market value fluctuations of the underlying investments.

The Sub-Fund's assets are segregated from assets of other sub-funds of the Fund. The assets of the Sub-Fund cannot be used to pay debts of other sub-funds.

The recommended holding period of this product is determined to allow sufficient time for this product to reach its objectives and avoiding short term market fluctuations.
