BinckBank - Binck Euro Bond Master Fund, a sub-fund of the LUX MULTIMANAGER SICAV

Class Ia EUR – Capitalisation shares: LU1646583507

Management Company: BIL Manage Invest S.A.

OBJECTIVES AND INVESTMENT POLICY

- BinckBank N.V. manages the investments of this sub-fund.
- Aims to achieve long term returns through exposure to investments in euro government and corporate bonds and money market funds. The sub-fund uses a combination of the Barclays 3-5 Year Euro Treasury Bond Index (60% weight) and the Barclays 1-5 Year Euro Corporate Bond Index (40% weight) or an equivalent index as benchmark (the “Benchmark”) for comparative purposes only and it is actively managed. Its performance can deviate significantly from the Benchmark.
- Invests in a combination of UCITS and other undertakings for collective investment (UCIs) which either qualify as exchange traded funds or as actively managed funds which invest in government and corporate investment grade euro bonds.
- The selected UCITS or other UCIs either (i) track part or all of the Benchmark or (ii) are expected to provide risk adjusted returns compared to the Benchmark.
- The sub-fund invests at least 70% of its net assets in UCITS.
- Financial derivative instruments and techniques, and instruments relating to transferable securities and money market instruments may be used for efficient portfolio management and hedging purposes.
- Income is accumulated in the share price.
- Shares can usually be bought and sold each business day and are reserved to BinckBank N.V..

RISK AND REWARD PROFILE

- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level. If the fund was launched less than 5 years ago, the risk category is calculated on the basis of the performance of the benchmark; if this is not available, other objective classification criteria are used.
- The historical data may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The lowest category does not mean “risk-free”.
- There is no guarantee or mechanism to protect the capital.

Investors should be aware of the significant risk below, which may not necessarily be adequately taken into account by the indicator:

- **Risk of investing in bonds:** include a risk of inflation, of rating downgrade and interest rates fluctuations.
- **Investments in Exchange Traded Funds risk:** such investments are subject to market fluctuations and to the risks inherent in all investments.
