The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Europe Equity Select Sub-Fund, a sub-fund of the LUX MULTIMANAGER SICAV

### Class I EUR – Capitalisation shares: ISIN LU1972728213

Management Company: BIL Manage Invest S.A.

## OBJECTIVES AND INVESTMENT POLICY

- BIL Manage Invest manages the investments of this Sub-Fund.
- Aims to generate capital growth by outperforming the main European markets. The Sub-Fund is actively managed and uses the Stoxx Europe 600 EUR as benchmark (more information on [www.stoxx.com](http://www.stoxx.com)) to measure the performance.
- No investment restrictions are mentioned in regards to the benchmark.
- The performance can deviate significantly in comparison to the benchmark.
  - The Sub-Fund follows a well-diversified stock picking strategy based on algorithms. Said algorithms allow for an investment process in 3 parts:
    - The first identifies and ranks the movement and momentum of the single stock in the universe.
    - The ones with best scores are taken to the second screening where they are ranked by valuations.
    - Then, the remaining sub-universe will be screened for company quality.
  - The remaining basket of shares will be the investible universe, normally consisting of 50-100 stocks.
- The sub-fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the sub-fund.
- Income is accumulated in the share price.
- This Sub-Fund may not be appropriate for investors who plan to sell their shares in the sub-fund before 5 years. Investment in the sub-fund should be regarded as a long-term investment.
- Shares can usually be bought and sold each business day.
- The Initial Offering Period will be between the 24<sup>th</sup> of October and the 28<sup>th</sup> of November.

## RISK AND REWARD PROFILE

- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level. If the fund was launched less than 5 years ago, the risk category is calculated on the basis of the performance of the benchmark; if this is not available, other objective classification criteria are used.
- The historical data may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The lowest category does not mean “risk-free”.
- There is no guarantee or mechanism to protect the capital.

Investors should be aware of the significant risk below, which may not necessarily be adequately taken into account by the indicator:

- Investment in Equities risk: include in particular significant fluctuations in market prices, adverse issuer or market information and the subordinate status of equity compared to debt securities issued by the same company.
- Volatility risk: The value of the Shares may be affected by market volatility and/or the volatility of the Sub-Fund’s assets and/or the underlying asset.
- Market risk: value of investments may be affected by uncertainties such as international, political and economic developments or changes in government policies.
