RISK AND REWARD PROFILE

- The risk level shown reflects the fund's historical volatility, completed where applicable by that of its reference framework. The volatility indicates the extent to which the value of the fund may fluctuate upwards or downwards.
- The historical data may not be a reliable indication for the future.

- The indicated category may vary over time.
- The lowest category does not mean "risk-free".
- There is no guarantee or mechanism to protect the capital.

Investors should be aware of the significant risk below, which may not necessarily be adequately taken into account by the indicator:

- **Concentration risk:** given the significant concentration of assets in one market segment and a limited number of issuers, the risks potentially associated with a deterioration of the fundamentals and/or the liquidity of this segment would have a greater impact on the assets compared to a more diversified portfolio of assets.
