What is this product?

TYPE OF PRODUCT

The product is a sub-fund of Lux Multimanager SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However, the Board of Directors of the Fund may decide to close the Fund under certain circumstances.

OBJECTIVES

The Sub-Fund's investment objective is to achieve appropriate income and the highest possible long-term value increase by investing within:

- Defense, aerospace and security sector (including homeland and cyber security);
- Technology, commodity, infrastructure sectors necessary for society resilience, self-sufficiency, resource independence and for energy transition, digitalisation and electrification.

The Sub-Fund will invest mainly in securities of companies without geographical restrictions with the exception of defense companies in Russia and China and in accordance with the principle of risk diversification.

The MSCI World Index captures large and mid-cap representation across 23 developed markets countries as classified by MSCI Inc. The index covers approximately 85% of the free float-adjusted market capitalization in each country. More information, including the list of developed markets countries currently included in the Benchmark, can be found on <https://www.msci.com/world>.

Investment Strategy

The Sub-Fund promotes environmental and social characteristics pursuant to article 8 of SFDR but has no sustainable investment objectives, as described in Appendix I of the Prospectus.

The investment strategy for achieving the investment objective is to continuously evaluate trends over the short to medium term time horizon to determine which companies are best positioned to benefit of those trends and have ability to create sound risk adjusted performance for the Sub-Fund and its investors. The Sub-Fund sees clear trends and strong development in each of the sectors above, but trends might take time to develop and part of the portfolio management would be to manage the exposure and risk to these trends. Each sector and subsector are continuously assessed on an individual and relative basis to determine attractiveness of exposure in the sector and accompanying risks.

The policy and strategy used to pursue the investment objective is to invest mainly (at least 51%) in listed equities in security/defense sectors. Investment in the other sectors listed in the investment objective above will vary over time based on risk reward assessment and strength of trends within the sectors.

The Sub-Fund may use derivatives, certificates with eligible embedded components which may also include derivative (discount, bonus, leverage, knock-out certificates, etc.) and other techniques and instruments for hedging and efficient portfolio management, for maturity or risk management of the portfolio or to generate income, i.e. for speculative purposes. In case such transactions relate to the use of derivatives, then the terms and limits must comply with the investment limits.

This Class is cumulative. Dividend distributions are not planned.

Benchmark MSCI World TR USD Index (100%) or an equivalent benchmark (the "Benchmark").

Base Currency USD.

What are the risks and what could I get in return?

Risk indicator

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Fund is not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level. Poor market conditions could impact the Fund's capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the prospectus for more information on the specific and material risks relevant to the Fund not included in the summary risk indicators.

This Fund does not include any protection from future market performance, so you could lose some or all of your investment. If the Fund is not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example investment:		5 years SEK 100 000		
		If you exit after 1 year	If you exit after 5 years	
Scenarios				
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.			
Stress scenario	What you might get back after costs Average return each year	SEK 61 800 -38.2%	SEK 15 000 -31.5%	
Unfavourable scenario	What you might get back after costs Average return each year	SEK 86 900 -13.1%	SEK 103 800 0.7%	This type of scenario occurred for an investment in the product between October 2022 and December 2023.
Moderate scenario	What you might get back after costs Average return each year	SEK 108 700 8.7%	SEK 167 100 10.8%	This type of scenario occurred for an investment in the proxy then the product between February 2018 and February 2023.
Favourable scenario	What you might get back after costs Average return each year	SEK 153 100 53.1%	SEK 210 900 16.1%	This type of scenario occurred for an investment in the proxy then the product between December 2018 and December 2023.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if BIL Manage Invest S.A. is unable to pay out?

There is no guarantee in place against the default of the Fund and you could lose your capital if this happens.

The Sub-Fund's assets are held with CACEIS Investor Services Bank S.A. and are segregated from the assets of other sub-funds of the Fund. The assets of the Sub-Fund cannot be used to pay the debts of other sub-funds.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- SEK 100 000 is invested

Investment of SEK 100 000	If you exit after 1 year	If you exit after 5 years
Total costs	SEK 2 384	SEK 18 764
Annual cost impact (*)	2.4%	2.4%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 13.2% before costs and 10.8% after costs.
